ECI Enters into Partnership with GE Medical Systems Hong Kong Limited

Effector Cell Institute (ECI) is pleased to announce that it has come to agreement on partnership with GE Medical Systems Hong Kong Limited. This agreement is based on the resolution on a business alliance for marketing and sales of CYTORECON™, ECI's proprietary automatic cell counter, in the Chinese market, adopted by the company's Board of Directors held today.

CYTORECON™ is a unique image analysis system that automatically counts the total number of cells in a test sample.

CYTORECON™ was already launched on the Japanese market in March 2007 based on the comprehensive business tie-up agreement for domestic sales activities, concluded on January 22, 2007 between ECI and GE Healthcare Bio-sciences Ltd.

According to the business tie-up agreement to be concluded this time, GE Medical Systems Hong Kong Limited will be ECI's exclusive sales agent in the region of China. Thus the marketing and sales of CYTORECON™ is expected to expand to mainland China, Hong Kong, Macao, and also to Taiwan.

CYTORECON™

* A brief corporate profile of GE Medical Systems Hong Kong Limited is given below for reader's information:

Company name: GE Medical Systems Hong Kong Limited
